HOT WATER HEAT PUMP ALL-IN-ONE SYSTEM

Midea

OFFICIAL PARTNER

Midea, established in 1968 is a public company listed and since July 2016 a Fortune 500 company offering one of the most comprehensive ranges in the home appliances industry. Midea specializes in air treatment (residential and commercial solutions), refrigeration, laundry, cooking appliances, small kitchen appliances, water appliances, floor care and lighting.

Midea is My True Blue Idea

Our objective is to deliver the best home solutions for every Australia family. Our home solutions are inspired by the ideas and needs of our Australian guests. Therefore, we created the slogan "Midea is My True Blue Idea".

MD Appliances Pty Ltd

Founded in 2018 as MD Appliances Pty Ltd, we proudly represents Midea's Air Conditioning products in Australia. Our mission is to bring Midea's world-class air conditioning solutions to the Australian market, ensuring that homes and commercial buildings alike benefit from cutting-edge technology, energy efficiency, and superior comfort.

GO FOR HEAT PUMP WATER HEATER SUPPORTED BY GOVERNMENT INCENTIVES

STC

When a heat pump water heater is purchased, as high as an amount of Small-scale Technology Certificates (STCs) will be received, and these STCs can be used to discount the purchase price.

Federal Small-Scale Technology Certificate (STC's) entitlements for 2025

STC 2025*
Effective from 1 Jan 2025 to 31 Dec 2025

Activity	Zone 1	Zone 2	Zone 3	Zone 4	Zone 5
170L	15	15	18	19	19
235L	16	16	20	22	22
280L	16	16	19	21	21

VEU

The Victorian government provides VEECs to households in Victoria who are replacing electric water heater with heat pump water heater.

ESS

The NSW Energy Savings Scheme (ESS) provides financial incentives to install heat pump water heater in NSW households and businesses for replacing electric water heater.

In addition to the Federal STC rebates

State rebates are also available in same states to replace water heating systems with efficient ones such as heat pump water heater.

CHOOSE A SMART SAVER

10 AMP PLUG

The 10 AMP PLUG for water heaters is designed for both safety and efficiency! Featuring advanced overload and short-circuit protection technology, it ensures worry-free use. With its plug-and-play design, it easily integrates into household circuits, making installation quick and hassle-free. Whether for daily use or long-term needs, it delivers a stable and reliable hot water experience.

Highly energy-efficient, it boasts superior power conversion, heating water faster while saving electricity. Built with premium materials, it is heat-resistant and durable, ensuring a longer lifespan. Not only is it cost-effective and affordable, but it also complies with environmental standards, promoting green energy and adding an eco-friendly touch to your home and lifestyle.

Moreover, the 10 AMP PLUG is compatible with a wide range of water heater types, offering versatility to meet different household needs. Whether you're installing a new unit or replacing an old one, it is the ideal choice. Choose the 10 AMP PLUG for safety, convenience, and efficiency—let every day begin with warmth!

Smart Heat Pump Technology With 400% Remarkable Efficiency

With just 1 kW of power input, the Midea Smart Saver can generate over 4 kW of output heat, achieving an exceptional performance efficiency of 400%.

In contrast, conventional electric storage water heaters can only convert 1 kW of input power into a maximum of 1 kW of output heat, making them significantly less efficient.

Step 1: A fan draws in air, containing heat energy, across the evaporator. The evaporator turns the liquid refrigerant into a gas.

Step 2: The compressor pressurises the refrigerant into a hot gas.

Step 3: The hot gas inside the condenser coil heats the water inside the coil-wrapped tank. The refrigerant reverts back to a liquid after heating the water and continues to the evaporator for the process to start again.

Powered By One Of The Most Environmental Refrigerant

*The global warming potential (GWP) is refer to Intergovernmental Panel on Climate Change (IPCC).

Energy Saving

Compared to conventional electric water heaters, the Midea Smart Saver's exceptional efficiency allows you to save significantly on energy costs—so you can splurge on the things that truly matter.

(1) Calculation of energy consumption is based on CER (AS/NZS 4234) modelling in Zone 3; Applicable to 280L heat pump model.
(2) Calculation of energy consumption is based on CER (AS/NZS 4234) modelling in Zone 4; Applicable to 280L heat pump model. Electricity price is refer to Residential Electricity Price Trends 2021 by AEMC (Australian Energy Market Commission).

RIGHT FOR FAMILY BIG & SMALL

Family with 2-3 people

Simultaneous hot water supply for different rooms without interfering each other.

Family with 3-5 people

Enable seamless bathing by one after another without long-time waiting.

HEATING UP BUSINESS BIG & SMALL

Midea SMART Saver able to meet the needs of Motel, Barber shop, small restaurants, Coffee store, GYM etc.

GOT YOUR COVERED

Get You Covered with Two-Way Disinfection

Automatically Disinfection

periodically (24 hours) heating up the water by 60°C to prevent the growth of bacteria and legionella.

Manually Disinfection

set temperature (60°C) for rapid sterilisation.

Get You Connected with Wi-Fi Control

ECONOMY Mode (Heat Pump Only)

The standard mode where the highest efficiency is achieved.

E-Heater Mode

When the air temperature drops to below 5°C, the heat pump will automatically select E-heater mode for an electric hot water boost.

Hybrid Mode

The Heat Pump & E-heater operate together to ensure the set temperature is achieved.

EASY TO INSTALL

Lightweight Design

Midea SMART SAVER Heat Pump Water Heater (280L) is 15KG lighter than last generation heat pump water heater. It will be easier to transport and move, especially when installation spot is far away from loading spot or install in apartment.

Solar PV Ready

Australia has among the best solar resources in the world and households and businesses continue to install rooftop solar at world leading rates.

Midea SMART SAVER surplus solar energy generated by your Solar PV system can be stored in the tank.

In PV mode, the heat pump water heater receives a signal from the Solar PV system, notifying it that generated energy is available to use. It uses the available Solar PV energy to heat water and store it for later use.

EASY TO MAINTAIN

Easy-to-access E-BOX

Easy-to-access E-BOX Designed for easier maintenance without complicated disassemble of top cover of unit.

Error Code:

Quick checking out on-going problem and back tracking previous problem up to 3 times before.

Power Outage Memory:

Settings (set temperature, selected mode etc.) will automatically retained in the event of a power outage.
